

“ON” Framework 8

Speak Your Vulnerability

What the framework states:

Being On Means Being Real, Being Yourself, and to Express Your Humanity. In order to do this, you must speak your vulnerabilities instead of hiding from them.

What this means:

Allow yourself to express your humanity, your realness, your flaws, in a confident way that says: “this is who I am, and I’m comfortable enough with myself to say whatever I want.”

Big Ideas:

Vulnerability Humanizes You

Being On Means Being Real, Being Yourself, and to Express Your Humanity

By Expressing Your Humanity It Makes You Appear More Comfortable with Your Self

Vulnerability is not about blaming or complaining

Vulnerability is not about making a ton of self deprecating comments.

Speaking your vulnerability is about not hiding who you are out of fear that you won't be liked.

Awkward Situations Are a Great Time To Express Vulnerability

Example:

If you are talking to a girl who is younger than you, and you feel vulnerable about your age, instead of putting on a false bravado, you can simply address in a way that is read.

Say I'm talking about birthday...

My VERSION to a Girl

“Yea, I turned 37 last week, for some reason it hit me, I started having like a mid life crisis panic attack. I remember when I was a kid, I had this one uncle, he was my favorite, and I remember asking him “how old are you?” and he was 24. And I still remember doing the calculations in my head and thinking “man, you’re so old, its gonna be the year 2000 before I turn 24”. It blows my mind

how fast time goes. So what's on your bucket list?

The Reality of What I Just Said.

I got the age issue out of the question, but also used it as a chance to humanize myself, give the girl a glimpse inside my life, and show her that I'm comfortable enough with myself to say things that don't make me look "perfect" around her.

Homework:

Practice Speaking Your Vulnerability

Allow Yourself to not try to appear perfect around a girl. Express your likes, desires, interests openly, even if they don't make you look the standard definition of cool.
